ABOUT ME

🕒 Experienced IT professional with +8 years of specialization in Spring Boot, Microservices, Angular, Kubernetes and DevOps. Proven proficiency in designing, deploying, and maintaining scalable applications in agile environments. I'm driven by a keen desire to constantly grow, learn, unravel opportunities, and network with industry professionals. Excited and motivated to contribute to your dynamic team.

Strength: Adaptability, Creativity, Leadership, Public speaking

TECHNICAL SKILLS

🕒 AWS

IAM, EC2, EKS, S3, RDS

🕒 DATABASES

Postgres, Oracle, MongoDB

🕒 LANGUAGES

SQL, Java, SpringBoot, Angular, JavaScript, NodeJs

🕒 TOOLS

Maven, Jenkins, Docker, Kubernetes, Openshift, Git, Jira, Miro, Confluence

EDUCATION

🕒 BACHELOR OF ENGINEERING (ENTC)

MAY 2012 - JUN 2016

🕒 HSC, COMPUTER SCIENCE (CBSE)

APR 2011 - JUN 2012

WORK EXPERIENCE

🕒 LEAD APPLICATION DEV ANALYST | MAY 2021 - PRESENT

CITICORP SERVICES INDIA, PUNE, MAHARASHTRA

- Implemented CI/CD pipelines using Jenkins, automating the build, test, and deployment processes to facilitate seamless integration and delivery of microservices.
- Demonstrated proficiency in creating and designing EKS clusters on AWS cloud infrastructure, optimizing resources and configurations to support the deployment of microservices-based applications.
- Configured and maintained Helm charts for streamlined deployment and updates of Kubernetes applications.
- Collaborated effectively with cross-functional teams including developers, QA engineers, and system administrators to streamline deployment workflows and enhance collaboration across the software development lifecycle.
- Designed and implemented interactive user analytics dashboards using Java and Angular, providing real-time data visualization and insights for improved banking applications.
- Implemented state management using NgRx for efficient data flow and management in user analytics dashboards, ensuring seamless user interactions and updates.

🕒 FULL-STACK ENGINEER | AUG 2019 - APR 2021

YASH TECHNOLOGIES, PUNE, MAHARASHTRA

- Worked for John Deere services, under Enterprise Product Delivery Suite of SpringBoot, Angular applications. Designed and implemented a robust set of microservices architecture, leveraging best practices to ensure scalability, fault tolerance, and maintainability of distributed systems.
- Recognized for excellent teamwork and leadership in quick project delivery. Boosted team productivity by 15% by implementing Agile Scrum practices.

🕒 BACKEND JAVA DEVELOPER | DEC 2016 - JUN 2019

VYOM LABS PRIVATE LIMITED, PUNE, MAHARASHTRA

- Developed and documented REST based Java plugins enhancing AutomationEdge tool features as per Client requirements. Used Maven, Core Java, Springboot, ETL, Pentaho Data Integration as tools, achieved 7% increase in customer satisfaction through efficient tool development.
